

EXP.NO: 2

VIEditor& Nano

DATE: 20/01/2026

AIM:

To learn and practice text editing in Linux using the VI editor and the Nano editor for creating, editing, and saving files through the terminal.

ALGORITHM:

1. Start the experiment.
2. Open the Linux terminal.
3. Open a file using VI editor: `vi filename.txt`
4. Press 'i' to enter Insert mode and type the required content.
5. Press 'Esc' to return to Command mode.
6. Save the file using ':w' and quit using ':q' (or ':wq' for both at once).
7. Open the same or a new file using Nano: `nano filename.txt`
8. Type or edit content directly in Nano without mode switching.
9. Save the file using `Ctrl+O` and exit using `Ctrl+X`.
10. Verify file content using the `cat` command.
11. Stop the experiment.

CODE:

[illegible]

```
# Append a line using vi
vi sample.txt
# Press Shift+G (go to end), o (new line below), type text, Esc :wq

# Search inside vi
vi sample.txt
# In command mode: /demo then n to find next occurrence
```

OUTPUT:

```
[hp@localhost ~]$ vi sample.txt
[hp@localhost ~]$ cat sample.txt
This is a VI editor demo

[hp@localhost ~]$ nano nano_demo.txt
[hp@localhost ~]$ cat nano_demo.txt
Learning Nano Editor in Linux

[hp@localhost ~]$ vi sample.txt
[hp@localhost ~]$ cat sample.txt
This is a VI editor demo
Additional text added using vi
```

RESULT:

Thus, text files were successfully created and edited using both the VI editor and the Nano editor in the Linux terminal environment.
